

DRONE PROGRAM

IN ENGINEERING ESSENTIALS

Get FAA Commercial Drone Certified in Engineering Essentials!

Through our partnership with Iconic Drone Education, students spend part of the course learning about both manned and unmanned aviation, including aeronautics, weather science, sectional charts, and other foundational aviation concepts. The remainder of the course is dedicated to hands-on “fly days,” where students practice operating real drones and applying the skills they’ve learned in real life.

BECOME A CERTIFIED DRONE PILOT!
